

Multiverse Transmitter

If I just need 2 universes, is it better to use 1 radio in 2 universe mode, or both radios in 1 universe mode?

It would be better to use 1 radio in a 2 universe SHoW ID and set the second radio to a different ID and universe 0 or a universe that is not present in the system to make it's RF output as small as possible.

Unique solution ID: #1094
